

August 12, 2025

On June 4, the U.S. government increased the tariff on imported aluminum to 50%, doubling the 25% rate announced on March 12. No exclusions are currently being granted.

Using previously issued and expiring exclusions, Lamtec purchased additional foil inventory to temporarily offset the full impact of this tariff. We expect this inventory to be fully depleted during Q3.

To address the increased cost of the 50% aluminum tariff, we will implement the following price increases by foil gauge, effective October 1, 2025:

		<u>INCREASE</u>	
Metal Building:			
R-3035 HD, Arenashield		\$6.04/msf	\$0.065/m2
Radiant Ice		\$12.08/msf	\$0.130/m2
Duct, Fabrication, and Pipe:			
3035, R-3035, 30 J, 8849, 4348		\$6.04/msf	\$0.065/m2
WMP-ASJ		\$5.34/msf	\$0.058/m2
R-3050		\$9.93/msf	\$0.107/m2

Should the tariff change, either upward or downward, Lamtec will promptly adjust pricing and communicate any changes.

We recognize this is not ideal news heading into the second half of the year. By delaying implementation until our non-tariffed inventory is depleted, we aimed to provide our customers with as much cost relief as possible.

Please contact your Lamtec Sales Manager or Customer Service Representative with any questions.

Thank you for your continued support of Lamtec and our facing products.

Sincerely,
