**Subject: Price Increase of Spray Polyurethane Foam Products Effective April 15, 2026**

Dear Valued Customer,

Elastochem will be implementing a price adjustment of 8% on all closed-cell and 12% on open-cell spray polyurethane foam products. The price increase will be effective April 15, 2026, and will apply to all orders shipping on or after that date, or as existing contracts allow.

Due to the recent escalation in the Middle East and its impact on global oil markets, costs for raw materials and logistics have risen significantly. As a result, a price increase is necessary to ensure we can continue providing reliable supply and high-quality products.

To help manage supply responsibly and maintain consistent service, order quantities will be fulfilled based on historical purchasing patterns.

We value your partnership and remain committed to delivering high-quality products and dependable service. Our team continues to work diligently to minimize the impact of rising raw material costs on your business.

If you have any questions regarding this change, please contact your sales representative directly.

Thank you for your continued support.
