

March 18th, 2026

Dear Valued Enverge Spray Foam Customers,

The urethane industry is experiencing raw material price increases along with supply concerns due to raw material shortages and significant increases in fuel and transportation costs.

Amrize is working with our suppliers to ensure the continued availability of Enverge Spray Foam products to support our customer base. Amrize must now implement a price increase of up to \$0.14 per pound effective April 17th, 2026, or as contracts allow.

We value your business and will continue to invest in resources to support your growth and performance in the industry.

We greatly value your partnership. If you have any questions regarding your new pricing, please contact your Sales Area Manager.

Thank you for your continued support.

Sincerely,

Kevin Page
