RE: Price Adjustment – Effective April 15, 2026

Dear valued customer,

We understand that price increases create real challenges for your business, and this decision was not made lightly. At Quadrant Performance Materials, we value our partnership with you and remain committed to supporting your success.

Despite continued efforts to manage costs, we are experiencing sustained increases in key raw materials and freight. As a result, we must implement a price increase of **\$0.18 per pound** on all orders shipped on or after **April 15, 2026**, or as existing contracts allow. These market pressures are being driven by several factors, including:

- Geopolitical instability impacting global supply chains
- Crude oil disruptions, including constraints through the Strait of Hormuz
- Force majeure declarations affecting critical raw materials such as propylene oxide, resulting in polyether polyol supply constraints and allocations

We will continue to monitor supply conditions and communicate promptly should circumstances change. Even in this challenging environment, Quadrant continues to invest in new products and programs to help our customers achieve profitable, sustainable growth, including:

- Expansion of the EnviroSeal Advantage program, leveraging brand demand and home builder specification to put more projects in our customers' pipelines
- Startup of a third closed-cell production unit to strengthen supply reliability and reduce disruption during peak demand
- Introduction of a new open-cell product with 10% more yield and closed-cell products designed to improve efficiency and increase job-site profitability

Your local quadrant sales representative will contact you to discuss how this adjustment impacts your account and to help minimize disruption during the transition. We appreciate your understanding, your business, and the trust you place in Quadrant Performance Materials.
