Mount Airy, NC

Missouri City, TX

April 30, 2026

Dear Valued Customer:

As a result of continued increases outside of our control due to supply issues of polyol and rising cost of MDI feedstock along with increased transportation costs, NCFI Polyurethanes Spray Foam Systems have increased in cost. Effective May 15, 2026, NCFI will implement a 12% increase on Closed Cell, Open Cell, OEM Spray and Roof Spray Foam Systems.

Materials shipped after May 15th, 2026, will be invoiced at adjusted prices.

Due to supply disruptions SPF systems will be impacted. NCFI remains committed to providing quality spray polyurethane foam systems delivered with exceptional service from the most experienced professionals during these most difficult times.

NCFI appreciates your understanding and your valuable continued business. Please contact your account manager if you have any further questions.

Regards,

NCFI Polyurethanes
